# TESTIMONIALS

When the sales managers reached out to me to test their ergonomic table Ergoz™, first I was concerned with the price, however now I understand its worth the money.

I often work from home and I didn't wanted to replace my custom plank table with the electronic elevative table. Well, Ergoz™ was suddenly the solution. My wife appreciate that I can always fold and store my working station when we are having family lunch or dinner.

***Andreas Mørch, 33 years old - about Ergoz™ table***

When I ordered my first Ergoz™ table, I was using it from time to time, I liked the idea of not having any extra cables leading to electrical socket through my apartment avoiding kids tripping over it and I could kept my dinner table all while working and standing but after some time I found my-self sitting again. After secong pregnancy I faced pain in neck and shoulder blade area and Ergoz™ table was a solution.

However, after Ergoz reach out to me again with their new product StepUp™ and I even got an good offer.

Now, I know what my previous problem was. While working and standing I didn't stand straight, I was moving from place to place but this StepUp™ board made me stand at one place and balance at the same time.

After using it daily I'm having less neck pain and even my productivity went up! I can state that this additional StepUp™ board solved my previous issues and even made my home office job more interesting.

***Birgitte Mølgaard, 29 years old - about Ergoz™ table and StepUp™ board***

Since, I started my career as an accountant, I work daily with numbers and that requires high concentration and focus. Sitting at office chairs started to paying it's price and I started having lower-back pain. I wasn't paying attention to it until I recently reliazed I'm having struggles with focus and due to the back pain and I started doing mistakes. In my job errors are intolerable and I had to find a solution.

I looked for price-worth ergonomic chair or any other solution and in the meantime I met Kim Carlsen at WindSurfing event and he told me about his new company launching products solving crucial health issues, especially in office jobs. I was lucky to order one of the first prototypes of Dynamii™ chair. It is almost a year using it and I can already tell the difference.

Back pain is almost gone and my focus and work productivity went up like when I was younger.

When he reached out and asked me to write I review, I was more than pleased to do so and I can dearly recommend this ergonomic chair to everybody having office job facing the same struggles as I had.

***Nicolai Therkelsen, 41 years old - about Dynamii™ chair***
